EXPERIENCE

Trainee Software Engineer - Radixweb, Ahmedabad	Jan 2025 - April 2025
<ul style="list-style-type: none">During my internship, I gained hands-on experience with various technologies including JavaScript, TypeScript, Angular, and MS SQL. I focused on solving real-world problems related to core concepts in each technology.In JavaScript, I practiced asynchronous programming (Promises, async/await), closures, and event handling by building and debugging various logic-based problems.In TypeScript, I explored concepts like interfaces, type aliases, generics, and access modifiers, applying them to improve code quality and maintainability.In Angular, I worked on topics such as form validation using built-in and custom Validators, routing, component communication, and reactive forms. I implemented these features in small projects to strengthen my understanding.In MS SQL, I practiced writing queries, joins, stored procedures, and functions by solving data manipulation and retrieval problems.	

PROJECTS

eCommerce <i>React JS, Node Js, Express Js, MongoDB, JWT</i> 
<ul style="list-style-type: none">Built an e-commerce web application with product listings, filters, and shopping cart functionality.Integrated sign-in/sign-up with JWT for user authentication and managed user sessions.Implemented product filtering based on category, price, and brand, and provided a seamless checkout process with order creation and shipping management.
